WORK EXPERIENCE

SHARDINGS | Software Engineer Intern

Remote | May 2022 – April 2023

- Integrated **subscription functionality** with **Razorpay**, streamlining the payment process and driving a **15% increase in revenue**.
- Developed a user-friendly **dashboard** using **React** and **Tailwind**, resulting in a **25% reduction** in analyzing delivery driver work sessions.
- Created a **Token-queue-system** feature in **React Native**, enabling efficient management of **meeting participants** and increasing **meeting organization by 15%**.
- Implemented scalable **REST APIs** with **Express** and **Firebase**, leading to a **20% improvement** in system response time. Integrated APIs seamlessly with the **frontend UI** for enhanced user experience.
- Implemented real-time **chat communication** with **Firebase**, facilitating seamless collaboration and improving team productivity by **20%**.

PROJECTS

WANDERSTAY - TRAVEL ADVISOR

GitHub | DEC 2022

- Developed a travel advisor web application using **Next.js**, **Tailwind CSS**, **Mantine UI**, and **Firebase**.
- WanderStay allows users to search for accommodations, view detailed information, and sign in using their Google accounts.
- Implemented features such as user authentication, database integration, and responsive design.
- Leveraged **Firebase Authentication** for secure user sign-in and management.
- Utilized **Firebase Firestore** for storing and retrieving accommodation data.

RSPOTIFY -REVAMPED SPOTIFY

GitHub | JAN 2022

- *Yet another spotify clone*; Stream your favorite songs or Search for new one, even by Albums, Artists, playlists.
- Revamped spotify with **Next.js (React)** and styled with **Tailwind.css** and **HeadlessUI**.
- Implemented Authorization with **spotify's OAuth** authorization using **NextAuth**.
- Used **Recoil.js** for state management and can also handle song playback from other devices on the same account.

ACHIEVEMENTS

- Contributed to **GirlScript Summer of Code 2023**, actively participating in open source projects.
- Rated **1828 (4*)** on **CodeChef** and max rating of **1200+** on **Codeforces**.
- Ranked **343** out of **15,000+** participants in CodeChef's February Cook-off 2022 contest.

SKILLS

Languages: C/C++, JavaScript, TypeScript, Go.

Web Development: React, Nextjs, Nodejs, Tailwindcss, Redux.

Tools: Git/GitHub, Postman, Visual Studio Code, Windows Subsystem for Linux (WSL).

EDUCATION

Bachelors of Science in Computer Science

MH, INDIA | 2021-2023

 University of Mumbai

CGPA: 9.63

Coursework: Data Structures and Algorithms; Operating Systems; Computer Networking; Databases; Object-oriented programming
